

Visa Secure EMV 3DS Certification Testing

Global ■ Quick Reference Guide (QRG)#09.01 ■ 6 September 2023

Visa Secure Test Suite (VSTS) testing is required before a product provider's software can connect to Visa's Directory Server for EMV 3DS. VSTS testing ensures that a product provider's authentication software meets Visa Secure program requirements for EMV 3DS.

About this Guide

In this QRG you can find information about ...

- [Visa Secure Test Suite \(VSTS\)](#)
- [Certification Overview](#)
- [Questions and Answers](#)
- [Purchasing a VSTS subscription](#)
- [Getting Access to Visa Online \(VOL\) and Visa Secure Services \(VSS\)](#)

Audience

This document is located on www.visasecureservices.com and is intended for

- 3DS Product Providers
- Parties who will be connecting their 3DS software to Visa's Directory Server, and
- Visa Staff who are responsible for supporting 3DS.

Visa Secure Test Suite (VSTS)

- Is a platform that 3DS Server and Access Control (ACS) software product providers use to complete Visa-specific testing after receiving an EMV 3DS Letter of Approval (LOA) from EMVCo.
- Simulates the functionality of all 3DS 2.0 baseline components (i.e., 3DS Server, Directory Server, and ACS).
- Tests whether the product provider's 3DS Server (3DSS) and ACS software meet Visa Secure's technical and business requirements for EMV 3DS.

Products Tested

The following 3-D Secure 2.0 products are covered by Visa's 3DS product testing in VSTS:
Access Control Server, 3DS Server.

NOTE: Validation of the SDK is not in scope for Visa's 3DS product testing in VSTS, which covers only the integration of the SDK with the 3DS Requestor environment and the validation of the App message format. Additional details are covered in the *Visa 3DS Test Suite User Guide*.

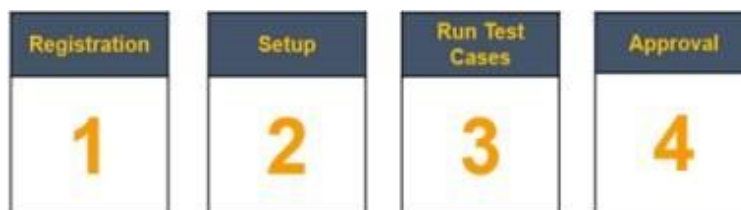

Prerequisites

Before any VSTS testing tasks can begin, the product provider must:

- Successfully complete EMVCo 3DS Testing and obtain a Letter of Approval
- Sign applicable Visa agreement(s)
- Obtain a Visa Business ID
- Complete Visa's Security Requirements

Certification Overview

The steps involved in Visa Secure product testing can be summarized as follows:

STEP 1 - Registration

As a first step, the product provider must register and request access to Visa 3-D Secure Test Suite (VSTS). A Visa Business ID and EMVCo Reference Number are required for registration. Software sellers that are not eligible for a Visa Business ID should acquire and use a UVID (Unique Visa Online ID) instead. Instructions on obtaining a UVID can be found in this document in the "Getting Access to Visa Online (VOL) and Visa Secure Services (VSS)" section.

Additionally, product providers must prepare a certification package containing the following materials and must email it to gctv3dsts@visa.com. The Visa Business ID should be noted in the email.

Depending on the implementation type, a product provider would need to provide the following:

- Copy of EMVCo Letter of Approval (LOA) with the corresponding EMVCo Reference Number for the product provider's components that will be tested
- Copy of PCI 3DS AOC and/or PCI DSS AOC (if connecting to the Visa DS)
- Proof of participation in Visa's 3rd Party Agent Program (applicable for product providers testing 3DS Server component)

- Signed Copy of Visa 3DS Product Provider Agreement (applicable for product providers testing ACS component)
- Copy of Visa 3DS Annual Letter of Approval from Visa's 3DS Security Program (applicable for product providers testing ACS component)

STEP 2 - Set-up

A Visa test analyst will review the application package and the registration information to enable access to VSTS. Upon approval of access to VSTS, the product provider must request test certificates for the component for which they are performing testing.

VSTS issues its own certificates for connectivity and signing. Additional set-up details are available in the VSTS User Guide and V3DS Product Integration FAQs accessible from the VSTS home page.

STEP 3 - Run Test Cases

The Visa 3DS Test Suite is a self-testing service. Please keep in mind:

- VSTS provides a standard set of required and optional test cases that help 3DS Server and ACS software product providers to confirm that their software meets Visa 3DS product and business rules. Detailed descriptions of the applicable test cases are available in the VSTS User Guide.
- Product providers must complete all required test cases.
- Test results (i.e., pass or fail) are available immediately. If any of the test cases fail, they must be rerun until successfully completed.
- CAVV Testing is required for ACSs. CAVVs are created using Visa test CAVV keys.

STEP 4 - Approval

Upon completion of the required test cases, the product provider shall request the Visa 3DS 2.0 Compliance Letter by clicking the applicable link in VSTS. A Visa test analyst will review the test results and approve the request. The Compliance Letter shall be available to download from VSTS and an electronic copy of the letter shall also be sent to the registered email ID.

The Compliance Letter is valid for a period of 2 years. Additionally, the product provider's component will be listed on Visa 3-D Secure Compliant Product List.

Contact

For additional assistance, please contact your Visa representative.

QUESTIONS & ANSWERS

Visa Secure Test Suite (VSTS)

1. What is Visa Secure Test Suite (VSTS)?

- Visa's EMV 3DS testing today supports EMV 3DS 2.2 testing.

2. What is the signup process for VSTS?

- Product providers who have completed EMVCo's 3DS 2.2 testing can contact Global Client Testing (GCT) team at gctv3dsts@visa.com for more details.

3. If I have already completed and submitted my materials for the Application Package as part of a prior VSTS certification session, do I need to do this again for a new VSTS test session?

- If the elements of your Application Package are current, not expired, and meet the Application Package requirements, you will not need to resubmit the entire Application Package for Visa EMV 3DS 2.2 testing.
- At a minimum you will need to send a copy of your new EMVCo 3DS Letter of Approval (LOA) for your product.

Protocol Versions Supported

4. Is Visa testing for EMV 3DS 2.2 mandatory?

- If you plan to implement 3DS 2.2, Visa testing for EMV 3DS 2.2 is mandatory.

5. Does Visa's Directory Server support EMV 3DS 2.2?

- Visa's Directory Server supports EMV 3DS 2.2.

6. Will 3DS 2.1 standalone testing continue to be available from Visa?

- No. Visa no longer supports certification for standalone EMV 3DS 2.1 solutions.

7. Is EMV 3DS 2.3 available to test with Visa?

- Visa will announce EMV 3DS 2.3 testing availability at a future date. A product with an EMVCo 2.3 certification will be tested and certified by Visa against EMV 3DS 2.2 test cases.

General Visa Testing Questions

8. Can I start Visa testing at the same time as my EMVCo 3DS testing?

- No, EMVCo 3DS testing is a prerequisite for Visa's EMV 3DS Testing.

9. What components does Visa testing support?

- Visa testing support is available for 3DS Server and ACS components. SDK testing is not supported.

10. How much time is needed for Visa testing?

- The objective of Visa testing is to confirm that a 3DS software product supports Visa Secure program requirements; functional testing done with EMVCo is not repeated.
- The Visa Testing process can take a few days to a few weeks depending on your system's readiness to connect to Visa's test environment.

11. Can I get a copy of Visa's EMV 3DS test cases in advance of testing?

- Visa's EMV 3DS test cases are accessible once the prerequisites to begin Visa testing are completed. Contact Global Client Testing (GCT) team at gctv3dsts@visa.com for more details.

12. Are there charges for VSTS certification testing?

Clients are required to pay Visa Secure testing fees for the use of the Visa Secure Test Suite (VSTS) certification platform.

- A VSTS Base Subscription is available which provides 90 calendar days of access to VSTS.
- A VSTS Extension is available for the Product Provider to add an additional 30 calendar days of access to VSTS.

Visa Testing Considerations

13. I have a product from a prior VSTS certification and a product that I recently certified with VSTS, can I separately list them on the Visa Secure EMV 3DS Approved Product List

- Indicate that this is your intent with the GCT test analyst during set-up. The GCT test analyst will review your request and if appropriate, will guide you through the specific process to ensure separate entries are created on Visa's EMV 3DS Compliant Product List. Separate EMVCo 3DS approval letters must be shared with Visa.

CAVV Testing

14. Which CAVV versions are supported for Visa's EMV 3DS testing?

- Visa Secure only supports CAVV Usage 3 version 7. VSTS CAVV testing is available for CAVV Usage 3 version 7 only.

15. What is CAVV version 7?

CAVV Version 7 (Usage 3, Version 7) carries supplementary data elements from the authentication request (AReq message) from the merchant, including:

- Authentication amount
- Authentication currency code
- Authentication date (Purchase Date) as provided in the authentication request from the merchant must be converted to Julian Day based on UTC/GMT (do not apply local time zones)

For technical and program details, please refer to the CAVV Guide and Visa's PSD2 Strong Consumer Authentication (SCA) guide.

16. Is it mandatory that I use CAVV version 7?

- Visa Secure requires the use of CAVV version 7.

17. For the purposes of testing, can ACS product providers use their own CAVV keys?

- CAVVs are created using VisaNet Certification Management Service (VCMS) test CAVV keys.
- CAVVs can be created using an issuer's CAVV keys and can be validated using VCMS. Prior issuer CAVV key installation is required, and applicable fees will apply.

Purchasing a VSTS Subscription

To purchase a VSTS subscription you will need to do the following:

Login to Visa Secure Services

- Login to VOL via www.VisaSecureServices.com or via Visa Online (VOL) login page
 - Select “Visa Secure Services” from the VOL homepage.
-

VSS Store

Access Visa Secure Services

Once you access Visa Secure Services, navigate to the VSS Store (in the left navigation bar).

- Select “Purchase Subscriptions”
 - Choose “Visa Secure Test Suite (VSTS) subscription”. The VSS Store will display the VSTS subscription that applies to you. Choose the VSTS subscription option. Hit the NEXT button.
 - Choose Your Start Date. The End Date is calculated for you depending on the VSTS subscription type chosen. These dates are informational. You will have the opportunity to work with a Visa Test Analyst to finalize your testing dates. Hit the NEXT button.
 - Review your Order Information which includes: Payment Information, Order Summary, and Total Amount. Confirm that this information is correct. Hit the PLACE ORDER button.
 - The VSS Store will display an Order Reference Number when your subscription is processed.
-

VSS Library

Find the VSS Library in Visa Secure Services

- Filter By “Subscription Links”
 - Find your VSTS Subscription Link
 - Your VSTS access is enabled when your VSTS subscription is active and GCT has enabled your access.
-

Getting Access to Visa Online (VOL) and Visa Secure Services (VSS)

Scenario 1

Client user has
✓ Visa BID
✓ VOL User ID

Clients with VOL user IDs associated with a Visa BID can use their Visa Online (VOL) login IDs to request access to Visa Secure Services.

- Select “Request/Edit” under “My Services” on the Visa Online homepage after logging in.
- Visa Secure Services is listed under “Working with Visa”. Select “Request Service” link and follow instructions when you find “Visa Secure Services”.

Scenario 2

Client user has
✓ Visa BID
× No VOL User ID

Clients who have a Visa Business ID (BID) but do not have a VOL login ID can request a VOL login ID.

- Click the “**Enroll**” button on the [Visa Online login page](#). Following the instructions. The client will need to know their Visa BID to process this request.
- Once they receive their VOL login ID and password, select “**Request/Edit**” under “**My Services**” on the Visa Online homepage after logging in.

Visa Secure Services is listed under “**Working with Visa**”. Select “**Request Service**” link and follow instructions when you find “Visa Secure Services”.

Scenario 3

Client user has
× No Visa BID
✓ EMVCo 3DS
Approved Software

Clients who are not eligible to receive a Visa BID but have EMVCo approved EMV 3DS software can request assignment of a Unique Visa Online ID (UVID)

- The Visa Secure UVID Request Form can be found in the VSS Library, Filter By “Forms”.
- UVID users do not have access to VOL. UVID users will only have access to VSS.

A review and approval process is required for account provisioning.
